

TATuPDates 31/3 (2022)

News from the editorial office / Meldungen aus der Redaktion

TATuP

32/1 (2023) will be published in March 2023 with the Special topic

„Modeling for policy“

Models have become indispensable in the context of political decision-making. In particular, computer simulations and, increasingly, machine learning models play an important role here. AI models and simulation models pose a double challenge for technology assessment (TA): 1. These forecasting methods are used in the object domain of TA. 2. TA applies these methods itself.

TATuP's Special topic 32/1 (2023) addresses, among others, the following questions: Do options for action, evaluations, forecasts or justifications change through the use of such models? And, on a second level, to what extent does this change technology assessment, insofar as computer-based models are used to assess technologies? Does it change the courses of action considered in TA?

Special topic editors are Andreas Kaminiski (RWTH Aachen, HLRS Stuttgart), Gabriele Gramelsberger (RWTH Aachen), Dirk Scheer (ITAS/KIT Karlsruhe).

THANK YOU TO ALL REVIEWERS

for reviewing manuscripts submitted for publication in 2022!

DOAJ SEAL

TATuP was awarded with the DOAJ Seal. This award goes to “journals that demonstrate best practice in open access publishing” (<https://doaj.org/apply/seal/>). Less than 10 % of the journals indexed there have been awarded the Seal so far. A total of seven criteria must be met for the award, including articles must have permanent article identification (e.g. DOI), metadata must be uploaded to DOAJ on a regular basis, and the journal must be published under a CC license.
